

RHODOS FELLOWS

A next-generation living-learning community for student leaders in **information, design, and computing.**

DIGITAL LEADERSHIP

From engineering to arts, from business to biology—whatever course of study you pursue, your degree means more with real experience. In the **Rhodos Fellows** program, students from different majors come together to live in a unique faculty-led, high-achieving community to design creative solutions to interesting problems.

LIVING IN RHODOS

When you imagine thought leaders who change culture with new innovations, stories come to mind about thinkers and entrepreneurs from different backgrounds who came together to build something in a garage somewhere that changes the world. **Rhodos is your new garage.**

You'll meet and connect with national leaders in technology and entrepreneurship in Rhodos-exclusive programs. You'll have high-impact internship and service opportunities to distinguish your career path. You'll be eligible for grants, scholarships and

study abroad programs to take your research to new heights. You'll live down the hall from your own makerspace to make your ideas concrete.

THE RHODOS MAKERSPACE

Have an idea at an unusual time? Send a design to one of the 3D printers, then go down the hall to check on it (you don't even need to put shoes on). Whether you're using laser cutters or sewing machines, soldering irons or hot glue — even if you just need a group meeting space to share designs on a big screen — this is the magic garage where big things begin.

Some students have never written a line of code or touched a resistor. Others play with Raspberry Pis and virtual reality regularly. In Rhodos, there's space for people to get comfortable with brand new technology, and to grow their expertise if they're already familiar. We all learn from each other, support each other when we're starting out and challenge each other to go farther.

WHAT ARE YOU MAKING?

Become a Rhodos Fellow to live in a high-impact, productive community that will give you an edge in an information-rich world.

EVENTS & OPPORTUNITIES

Joining the Rhodos Fellows program gives you access to unique programs, special guests, and the Makerspace.

Visiting experts give workshops for Rhodos Fellows at every level of experience. Get started or improve your skills in game design, electronics, robotics, virtual reality, coding or 3D printing. Connect with **entrepreneurs**, internationally acclaimed **artists** and other world-class guests who share insights during special Rhodos events. Take advantage of **supplemental instruction** tutorials to enhance your understanding in course material and improve your grades right where you live!

Whether you're taking in the carnival vibe of a rally in the courtyard, sitting in a small-group seminar with the Faculty Principal, or just unwinding with coffee on Friday with the Rhodos staff, you'll connect with professors and your peers in a close-knit environment.

EXCLUSIVE CLASSES

Advance your program of study in classes exclusively for Rhodos Fellows, including: Digital Media Arts, Animation, Entrepreneurship, Public Communication, Algorithmic Design, Information Literacy and Technology, and our nationally-recognized University 101.

JOIN US

If you're interested in how your career will intersect with a digital world, Rhodos might be for you.

Once you're accepted to Carolina, you'll be prompted to sign up for housing. In the housing application process, choose **Information, Design, and Computing (Rhodos Fellows)** as your living learning community preference.

Then you'll get access to the Rhodos Supplemental Application, where you'll tell us more about yourself.

DEGREES OF RHODOS

Rhodos Fellows span more than 50 majors, including: **Media Arts, Computer Science, Engineering, Visual Communications, Theater, Computer Information Systems, Marketing, Integrated Information Technology, Music Performance, Psychology**, and more.

If you're undecided, Rhodos is a great way to learn with peers, get involved, and choose your path.

LED BY FACULTY

Professor Simon Tarr, an award-winning media artist and educator, is the Rhodos Faculty Principal. So you'll have faculty right where you live, designing an exciting experience with you.
